⚙ Automation

Advanced embedded technology

Automated lead generation

+ Discover new leads from over 1,000 sources

+ Search any topic like Google

+ Receive data instantly

+ Separate social media

databases

Automatic investigation

+ Complete investigation with just one click

+ Embed in-depth analyzed operations

+ Customize investigation steps

+ Automatically generate reports on demand
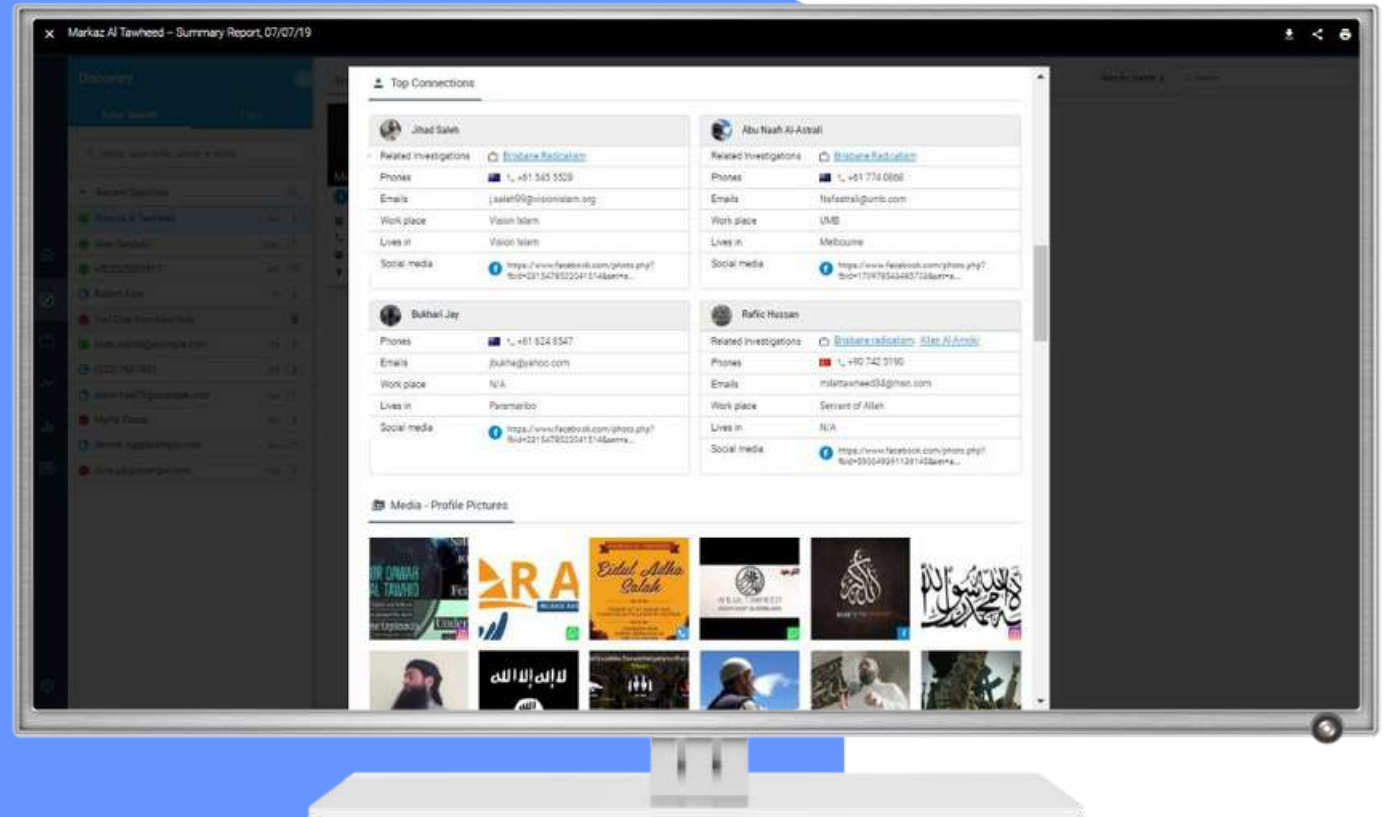

Automated content analysis

+ Images, videos

+ Facial recognition

+ Speech to text

+ Translation

+ Language analysis

+ Location extraction

+ Document analysis
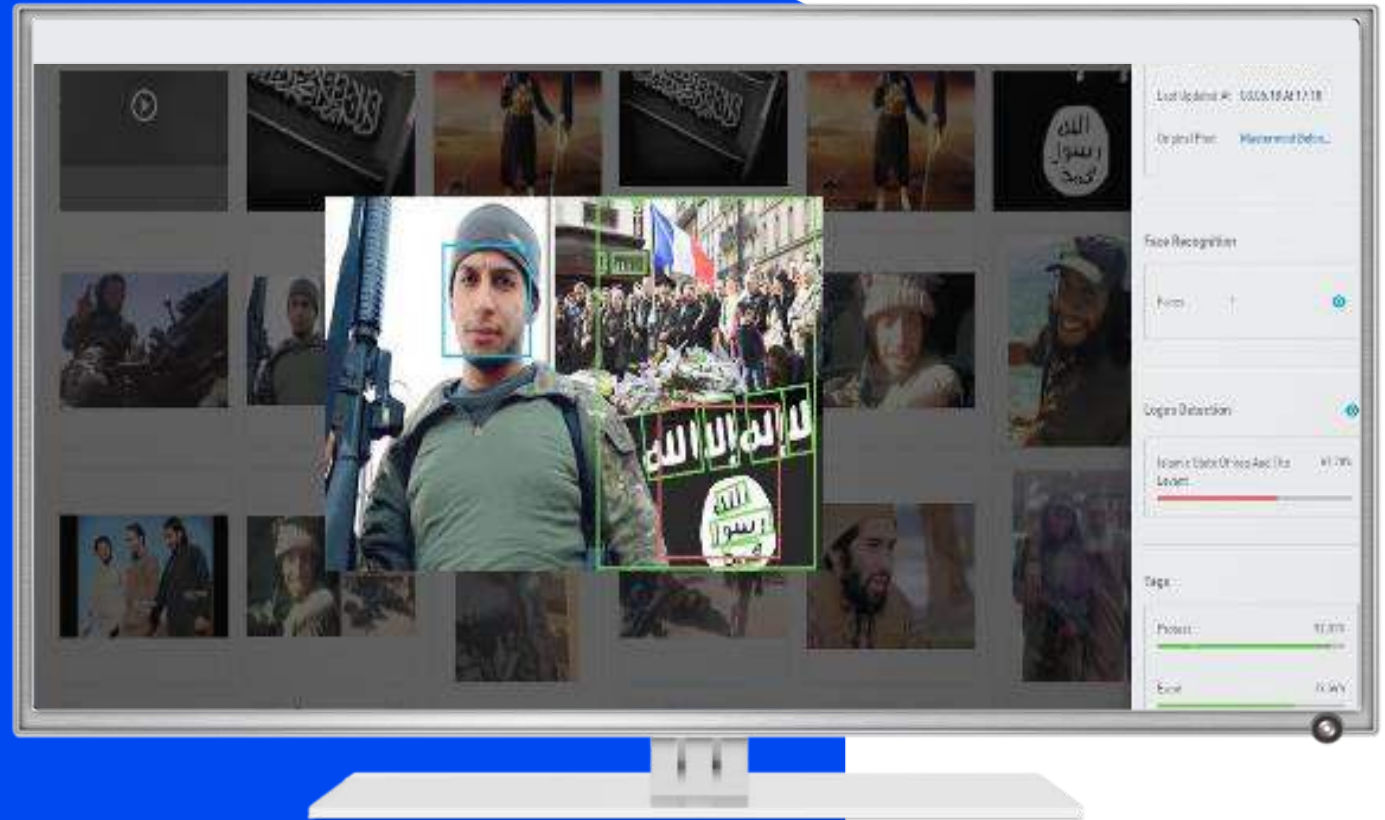

Automated target tracking

+ List of accounts in social media platforms

+ Notifications for new contact

+ Unified view – link multiple accounts together

+ Instantly display detailed information

Link accounts across social media platforms

SIMPLE

Designed by experts for the convenience of everyone

Investigation toolkit

+ Visual connection diagram & automatic clustering

+ Location tracking

+ Investigation management

+ Alerts & threat levels

+ Advanced filtering rules & tools
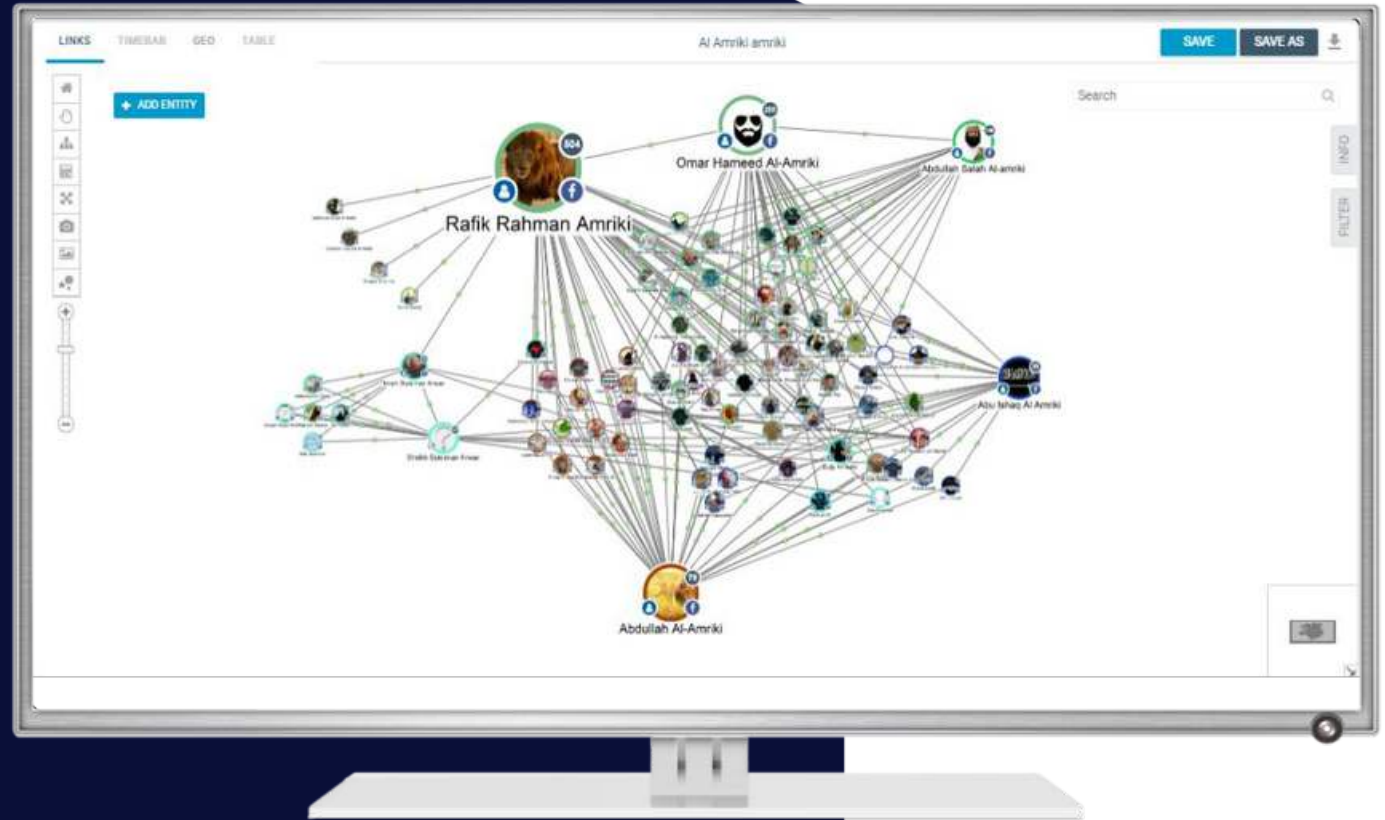

Data sharing methods

+ Digital whiteboard
+ Detailed insights and saved reports
+ Secure internal messaging
+ User activity tracking
+ Multi-tiered access control

RESPONSIVE MODELS

Customizable to fit your operational needs
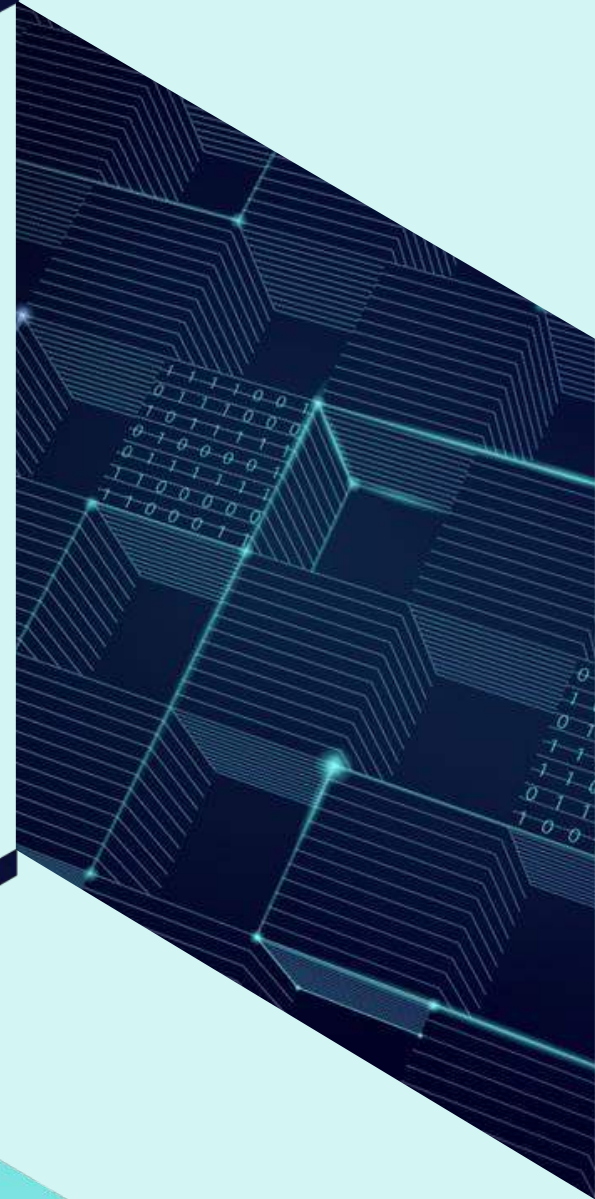

Real-time exploration

Real-time information

- Deep Web social media sites

- Private web IM applications

## Multi-platform collection for Mobile & Web

Collection

- Real name
- Phone number and email
- Images & media files
- Relationships & contacts
- Location & IMSI
